everyone is from different programs and has different schedules. Coordinating time is a challenge. Especially when it comes to finals, we are busy ourselves and it also happens to be the busiest time at the material bank because everyone needs material!

→ How do you want to expand the material bank?

SC: In the short term, we would love to be open for more days. We are trying to build a stronger team of volunteers so we could become more resistant. In the long run, we want to ensure that the knowledge of running the material bank gets passed along to the next generation of DAE students. It is always a challenge in a school environment when everyone is only here for a few years.

Another goal we have is to connect with industry beyond the academy, or even hardware stores for material donations. We can always pick up what they can't sell.

→ Where can students find you?

SC: For material, you can always come to us on Monday to Friday from 16.00 - 18.00. For any announcements, you can find us on [Instagram](#). We are always looking for new members or volunteers, please find us physically or email us at materialbank@designacademy.nl. We would love to have you!
